

ANNA SHOLOMII

PRODUCT DESIGNER

Toronto, Canada | anna.sholomii@gmail.com

LinkedIn - www.linkedin.com/in/anna-sholomii | **Portfolio** - <https://anna-sholomii.vercel.app>

Product Designer with 3 years as the sole designer at an early-stage B2B EdTech SaaS startup (acquired by IDP Education), working directly with founders, product, engineering, and customers to scale the platform to 100+ university customers. Built the design system and research practice from scratch, took conversion from 10% to 14%, and cut the sales cycle by 25% through hypothesis-driven A/B testing and product analytics. AI-native in practice, with Claude Code, Cursor, and AI prototyping part of the daily workflow.

TOOLS & SKILLS

Tools: Figma · Adobe Creative Suite · Mixpanel · Google Analytics · AI Tools (Claude Code, Cursor)

Skills: UX Research · Design Systems · Accessibility · Cross-functional Collaboration

PROFESSIONAL EXPERIENCE

Product Designer, The Ambassador Platform (Acquired by IDP Education, 2023) May 2019 - Apr 2022

B2B EdTech SaaS platform serving 100+ universities, colleges and schools · Sole product designer

- Improved prospective student conversion from 10% to 14% by redesigning the sign-up flow and widget layout. Applied data analysis, user research, and A/B testing to identify pain points, simplify steps, and clarify CTAs in collaboration with engineering.
- Built the company's design system and component library from scratch - standardizing colour contrast, typography, and spacing to improve visual accessibility, reduce engineering ambiguity at handoff, and establish consistent brand identity across all platforms.
- Cut sales cycle by 25% (40 → 30 days) through designing the customer onboarding experience - identifying and removing key usability barriers through research and iteration.
- Used Mixpanel and Google Analytics to track funnel performance and user behaviour - translating data into design decisions on conversion, retention, and onboarding flows.
- Validated new feature ideas with lightweight prototypes and user interviews before committing engineering time, so build cycles went only to ideas with confirmed signal.

Career Break, Maternity leave and child care

May 2022 - Present

- Completed AI Product Design course (idea validation through launch). Active in product design and AI tools workshops.
- Volunteered to design a reading platform for Ukrainian students, partnering with a small engineering team to ship it - live today with ~2,000 students, continuously growing, now expanding into Europe
- Independently designing and building a rental search app using Claude Code - helping users in the GTA find rental options based on school ratings.

EDUCATION

Master of Finance, Banking and Insurance | Chernihiv National University of Technology

2016-2018
