ANNA SHOLOMII

PRODUCT DESIGNER

Toronto, Canada | anna.sholomii@gmail.com

LinkedIn - www.linkedin.com/in/anna-sholomii | **Portfolio** - https://anna-sholomii.vercel.app

Product Designer with 3 years as the sole designer at a B2B2C EdTech SaaS startup (acquired by IDP Education), designing web applications and institutional software used by 100+ university customers. Built the design system and research practice from scratch; helped increase conversion by ~30% and reduce the sales cycle by 25% through hypothesis-driven A/B testing, analytics, and iterative UX improvements. AI-native - regularly use Claude Code and Cursor for rapid prototyping and concept development. Partnered with product managers and engineering to deliver end-to-end experiences and design systems in Figma.

SKILLS

Tools: Figma · Adobe Creative Suite · Mixpanel · Google Analytics · Claude Code · Cursor

Design & Research: User Research · Design Systems · Accessibility (WCAG 2.1 AA, VoiceOver) · Usability Testing · Information Architecture · Interaction Design · Prototyping · A/B Testing · Product Analytics

PROFESSIONAL EXPERIENCE

Product Designer, The Ambassador Platform (Acquired by IDP Education, 2023) May 2019 - Apr 2022

B2B2C EdTech SaaS platform serving 100+ universities, colleges and schools · Sole product designer

- Helped improve prospective student conversion by ~30%. Led the user-centered redesign of the sign-up flow and widget layout around customer needs and business goals, applying data analysis, user interviews, usability testing and A/B testing to identify pain points, simplify steps and clarify CTAs in collaboration with engineering.
- Used Mixpanel and Google Analytics to track funnel performance and user behaviour, translating analytics and performance metrics into prioritized design changes for conversion, retention and onboarding flows.
- Built the design system and component library from scratch in Figma, standardizing colour contrast, typography, spacing and interaction patterns to improve visual accessibility, reduce engineering ambiguity at handoff and create a consistent brand identity across platforms. Presented design rationale in team reviews to align founders and engineers.
- Helped cut the sales cycle by 25% through designing the customer onboarding experience. Interviewed both sales and customer success, then removed key usability barriers through research, prototype testing and iterative design.
- Validated new feature ideas with lightweight prototypes and user interviews before committing engineering time, ensuring build cycles were focused on features with confirmed user signal.

Independent Practice & Volunteer Work, Maternity leave and child care May 2022 - Present

- Volunteered to design a reading platform for Ukrainian students, partnered with a small engineering team to ship the product, now live with ~2,000 students and expanding into Europe.
- Designing and building Jarren, a native iOS fitness app in SwiftUI, using Xcode and Claude. Tested accessibility: WCAG 2.1 AA, VoiceOver, Dynamic Type, touch targets. Preparing for App Store submission.
- Led design and vibe-coding of a rental search app using Claude Code - rapidly prototyping and validating UX for GTA renters searching and filtering by school ratings and related signals.

EDUCATION

Master of Finance, Banking and Insurance | Chernihiv National University of Technology 2016-2018
